

VENTED NAILBOARD®

Polyisocyanurate Nailable Roof Insulation

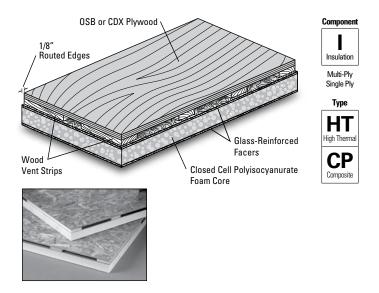

Polyisocyanurate Insulation meets ASTM C 1289. (available in 20 or 25 psi ENRGY 3)

Features and Components

OSB and **CDX Plywood**: Provides a strong nailable surface; always install wood side up. Available wood thickness: OSB (7/16" & 5/8") CDX (15/32" & 19/32"). All wood edges are routed 1/8" on all four sides to allow for expansion and contraction of the wood.

Vent Strips: See pattern on next page. For wood thickness (1", 1.5", or 2").

ENRGY 3: Closed cell Polyisocyanurate foam core bonded inline to glass reinforced facers (See ENRGY 3 data sheet), Vented Nailboard is assembled offline using staples (strip to wood attachment) and adhesives (strip-to-foam attachment).

System Compatibility This product may be used as a component in the following systems. Please reference product application for specific installation methods and information.

Codes and Approvals

- Incorporates APA/TECO Rating Sheathing Exposure 1 OSB
- Complies with EPA requirements and meets Clean Air Act Amendments of 1990.
- Third-party certification with the PIMA Quality Mark[™] for Long-Term Thermal Resistance (LTTR) values.
- UL Listed: refer to UL Directory of products.

Installation/Application

Mechanically

- All Vented Nailboards must be mechanically attached.
- Install Vented Nailboard wood-side up.
- · See following page for vent pattern.
- Refer to the application instructions guidelines for proper utilization of this product.

Packaging and Dimensions

Foa	ım Size	4' x 8' (1.22 m x 2.44 m)				
Pro	ducing Locations	Hazleton, PA				

Note: For available thicknesses, see *Product Data and Packaging* table on back side of this data sheet. Contact your JM Sales Representative for details.

Refer to the Safe for Use instructions and product label prior to using this product. The Safe for Use instructions are available by calling (800) 922-5922 or on the Web at www.jm.com/roofing.

Note: Technical information on this data sheet is intended to be used as a general guideline only and is subject to change without notice. Contact your JM Sales Representative for further details.

VENTED NAILBOARD®

Polyisocyanurate Nailable Roof Insulation

Polyisocyanurate Insulation meets ASTM C 1289.

Typical Physical Properties (ENRGY 3 Foam Layer Only)

Tes	st	ASTM Values	Vented Nailboard Results		
£	Tensile Strength	D 1623	730 psf (35 kPa) (nom)

5.50	140	24.2	4.3	7.9	2.51	12.25	9	250	

^{1.} The Long-Term Thermal Resistance (LTTR) values were determined in accordance with CAN/ULC S770 at 75°F (24°C). The ultimate R-Value of these products will depend on individual installation circumstances. Values in this table are 7/16" OSB (rounded up to 0.5") and a 1" vent spacer. As an example 2.5" vented Nailboard has 1" ISO, 1" vent spacing, and 0.5" OSB. LTTR using 5/8" OSB – add 0.1 R to above values. 2. Value represents average results. 3. Assumes 48' flatbed truck.
